

Unlock Innovation and Optimize Your Deployment

The Aurea Innovation Enablement Program paves the way to successful digital transformation with a phased approach to peak deployment health and eventual cloud migration. Designed to run on your timeline, the Innovation Enablement Program provides the resources and support you need to run the latest technology while maximizing stability, maintaining critical functionality, and minimizing business disruption.

Start Your Journey to a NextGen Experience

For many organizations, the move to cloud can seem like the classic choice between a rock and a hard place. It's currently difficult and expensive to keep legacy deployments up-to-date with the latest innovations. But while cloud promises affordable, hassle-free upgrades, getting there can require significant cost, complexity, and functional trade-offs.

The Innovation Enablement Program solves these challenges with a three-phase approach that advances current deployments and accelerates the move to cloud.

PHASE 1

Managed upgrades that allow you to take advantage of new capabilities, improved performance, and offerings like Extension Packs and Unlimited Packs

PHASE 2

Premium services that deliver sustainable technical success while preparing your platform for cloud readiness

PHASE 3

Comprehensive services that accelerate your journey to cloud without business disruption, delivering business value today and an innovation path for tomorrow

WITH THE INNOVATION ENABLEMENT PROGRAM, YOU CAN:

- Ensure you're running the latest technology
- Optimize deployment health
- Always be "upgrade ready"
- Maximize stability and innovation
- Migrate to the cloud without giving up critical functionality

Why Activate Your Innovation Enablement Program?

Running the latest technology comes with a long list of benefits. Up-to-date users report much higher levels of technical success, greater user happiness, and improved ROI on their software investment. With an optimized deployment, you can finally take advantage of all the innovation generated by your maintenance dollars.

This comprehensive, cost-effective change program will:

- Maximize your stability and innovation
- Resolve broken or problematic custom code that causes performance and technical issues
- Unlock new capabilities and innovation
- Eliminate operational risk, security, and loss of functionality associated with a move to cloud
- Equip you with trusted and skilled resources to migrate to the cloud

The future of software innovation is in the cloud. With the Aurea Innovation Enablement Program, you can get there faster, more efficiently, with fewer roadblocks and greater success.

THE THREE-PHASE APPROACH TO CLOUD-READINESS

Each Innovation Enablement Program engagement begins with a Program Assessment, a comprehensive review of your customizations, use cases, and integrations. Together, we create a prioritized action plan including value realization and program recommendations. The program is priced annually and includes sequential execution of all three phases.

PHASE 1

- Release planning and process improvements
- Managed upgrades
- QA of updated environment (technical and use cases)
- Performance benchmarking

PHASE 2

- Custom code onboarding
- Custom code elimination
- Custom code maintenance
- Integrations maintenance
- QA/verification of changes
- Alignment to cloud API framework

PHASE 3

Pre-migration:

- Cloud migration blockers assessment and resolution assistance
- Cloud rollout planning
- Use case configuration review
- New use case/capability evaluation
- Migration of data, integrations, and extensions
- Cloud-ready customizations
- Cloud-ready theme

Post-migration:

- QA/validations
