The Aurea Software Library
Your Aurea Benefits

As a buyer of software, you already know the challenge: stretching your IT budget and finding new ways to deliver innovation. Our goal at Aurea is to enable you to drive the pace of digital transformation by ambition rather than by economics.

That's why at Aurea, we've completely reimagined how enterprise licensing works.

Aurea is the ‘Netflix of enterprise software.’ And like Netflix, we offer access to our entire library for a single annual subscription fee. Like Netflix, that subscription enables you to consume any of the offerings in our library. And like Netflix, we will continually expand our library with new additions we build as well as acquire.

Here's how it works. Your spending power is set by your current product subscription. There is immediate value in your current subscription that you haven’t yet activated. With the amount you spend on your current product today, you’re entitled to that amount of any and all Aurea products.

There are three ways customer leverage Unlimited.

GET MORE VALUE FROM YOUR CURRENT PRODUCT.
Select a popular bundle we call Unlimited Packs that compliment your core Aurea product with another Aurea product to drive enhanced value from your existing deployment.

TAKE A SINGLE PRODUCT.
Select any product from the library - either replace a costly solution in your current IT stack, or add a new capability. We get you up and running with our complimentary onboarding and support.

ASK US TO CREATE A CUSTOM SOLUTION FOR YOU.
Customizations allow you to solve specific business problems. You tell us what you want to accomplish, and we'll design and implement the right combination of Aurea products to meet your needs.
Product List

This solution combines: Jive + Campaign Manager

Content Notifications
Improve employee productivity and expand Jive content reach with Content Notifications – notifying users when new content is posted to review.

This solution combines: Jive + AlertFind
To get the most value from your Unlimited subscription, we include complimentary onboarding to get you up and running on your new solution. Our onboarding process is based on best practices that have helped other clients successfully adopt these solutions. Get started in four phases:

**PHASE 1 — KICKOFF**
The Aurea PMO schedules a kickoff meeting with your project team to review the project methodology, schedule, and expectations.

**PHASE 2 - DEPLOYMENT**
We deploy your new solution and apply standard configurations, which include pre-configured best practice use cases that have been proven with our customers.

**PHASE 3 – TRAINING**
During this phase, you'll learn to manage the system, train your end users, and leverage more best practices for launching and adopting your solution.

**PHASE 4 – PILOT**
During the Pilot Phase, we host weekly Ask a Consultant Workshops to answer questions and help you plan and execute the launch of your new system.

Sample onboarding schedule for a basic Jive implementation.
Please note - final dates and durations are determined during the project kickoff meeting.
The software licenses and support are included in your subscription, up to your current spend. The implementation of new product or solution is performed through our complimentary onboarding services package which comes at no additional cost to you.

Once your system is up and running, we can provide additional custom services to expand your capabilities. Speak with our sales and services team if you’re interested in exploring more options.

**Use this worksheet to see how much you can save.** Select an Aurea product from the catalog, then fill in the costs from your current vendor’s comparable product.
